The above pregnant women that suffered miscarriage represented 41 of the 14701 total vaccinated in 2021. [Date of VARERS data download: 06th March 2021]

The CDC says that at any given time 5% of females of reproductive age are pregnant -O source citation: <https://www.cdc.gov/reproductivehealth/Emergency/PDFs/PregnacyEstimateBrochure508.pdf>

5202 of the above data set were females aged between 17 and 43 (reproductive age)

The CDC says that at any given time 5% of females of reproductive age are pregnant so 5% of 5202 = 260 probably pregnant

% of likely to be pregnat females suffering miscarriages following Covid vaccination = [41/260]*100 = 15%
